oltre il tempo

Sleeping Experience

n every fiber, the past. In every night, the future. In every sleep, Permaflex.

There is an ancient and instinctive gesture in surrendering to rest.

It's not just the need to sleep: it's the desire, often unspoken, to lay down the accumulated fatigue, the silent weight of lived days. When you choose a mattress, you're not just choosing the present: you're choosing how to care for what has been - and at the same time - how to protect what will come.

Because sleep is this: a subtle bridge between memory and possibility. A gesture of self-care, a suspended gift for your own tomorrow.

We at Permaflex have always known this. For over 70 years we have been listening to the body and time.

We have imagined them, studied them, intuited them, reinvented them. Every stitch, every layer, every fiber is born from a precise idea: that rest is not a luxury, but a responsibility. And those who lie on our mattresses deserve to be welcomed with love, respect, absolute dedication.

It's not just experience: it's a form of loyalty. Loyalty to those who need peace. To those who want to start again tomorrow. To the promise of finding ourselves, night after night. For this reason, each of our mattresses is a deep encounter between what you have been and what you can still become.

Because resting is not letting go. It's being reborn.

Permaflex, since 1953 synonymous with Italian rest

Permaflex began writing the history of mattresses as early as the early 1950s, when its founder imported an absolute innovation in the mattress field from America: the use of iron springs.

72 years have now passed since then and day after day, range after range, Research and Development have never known moments of pause: starting from the first “Piumaflex” products with 167 springs, with which Permaflex’s history began in 1953, increasingly sophisticated spring systems have been developed and mattresses made with innovative, highly technological materials have been introduced, always in step with the needs of its customers, since Permaflex has been, since its birth, synonymous with research and innovation, preserving the style and class that have always distinguished this great and unique brand, an established leader for 68 years.

MATTRESS

COLLECTION

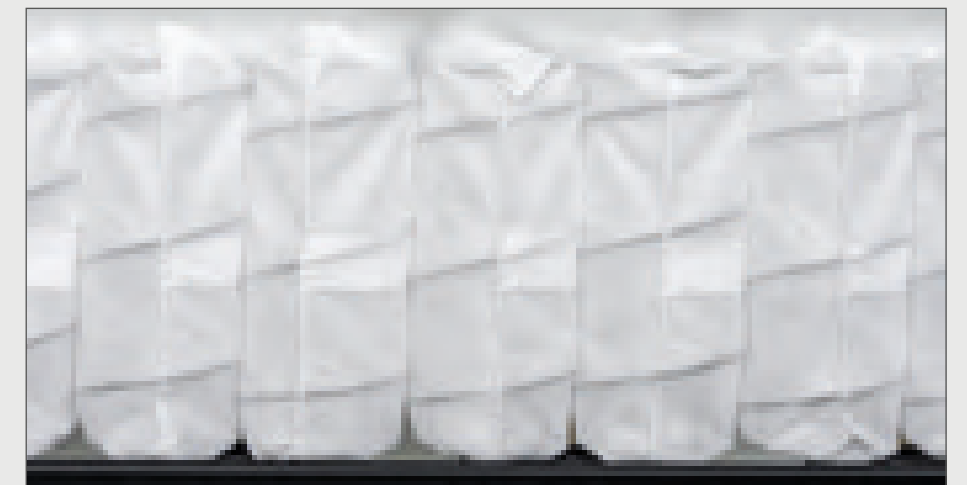

POCKET SPRING LINE

Pocket springs created by the Permaflex Research and Development Center represent an exclusive technological innovation achieving the optimal balance between support and comfort, while ensuring lasting durability thanks to the quality of the steel wire they are made of. Each spring, individually encased in a fabric pocket, compresses only when the body applies pressure to it, conforming to the natural curvature of the spine and perfectly adapting to each individual body part, providing exceptional comfort. Pocket springs with differentiated zones allow for appropriate and personalized adjustment of the support firmness level, offering enhanced softness in the shoulder and leg areas while providing increased support in the lumbar region. This helps improve blood circulation, alleviate cervical strain and reduce frequent nighttime tossing and turning, ensuring restful and uninterrupted sleep undisturbed by frequent micro-awakenings that leave you feeling tired and generally unwell in the morning.

MOD. 800

POCKET SPRING

TECHNICAL FEATURES

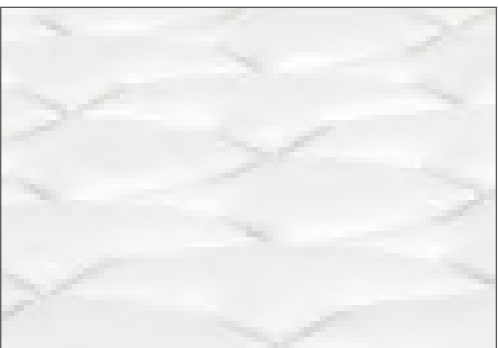

Supporting structure: 800 pocket springs model, equal to 680 springs dim. 90x200

Micro-aerated Touch Foam support

Breathable perimeter band

Jacquard fabric covering

INTENSITY

INTENSITY with anatomical support, is born from the precision and choice of high quality materials that Permaflex has selected for the Hotel Line. Thanks to its particular spring system with 800 pocket springs, it supports and gives a pleasant sensation to the body during rest. Maximum breathability is provided by the hypoallergenic padding and the special jacquard fabric. The quality of this mattress is completed by the perimeter anti-sag box. **G.d.P.** Guaranteed by Permaflex.

OPTIONALS - UNION ZIPPER

Thanks to the union zipper, available on request, creating a double mattress from two single mattresses has never been so simple. To ensure better anchoring, the zipper is sewn together with the mattress border, thus becoming imperceptible during rest.

COMPONENTS

- Multi-needle quilting.
 - Jacquard covering fabric with checkered pattern.
 - Techno TNT Firestop protective fabric.
 - High bearing hypoallergenic polyester fiber padding.
 - Breathable insulating layer in Techno TNT.
 - Micro-aerated non-deformable Touch Foam support with calibrated thicknes.
- 800 pocket springs model.
 - Quilted and padded perimeter band with high breathability.
 - Anti-sag reinforcement perimeter box in high-density micro-aerated Touch Foam with increased thickness of approximately 6 cm

BONNEL SPRING LINE

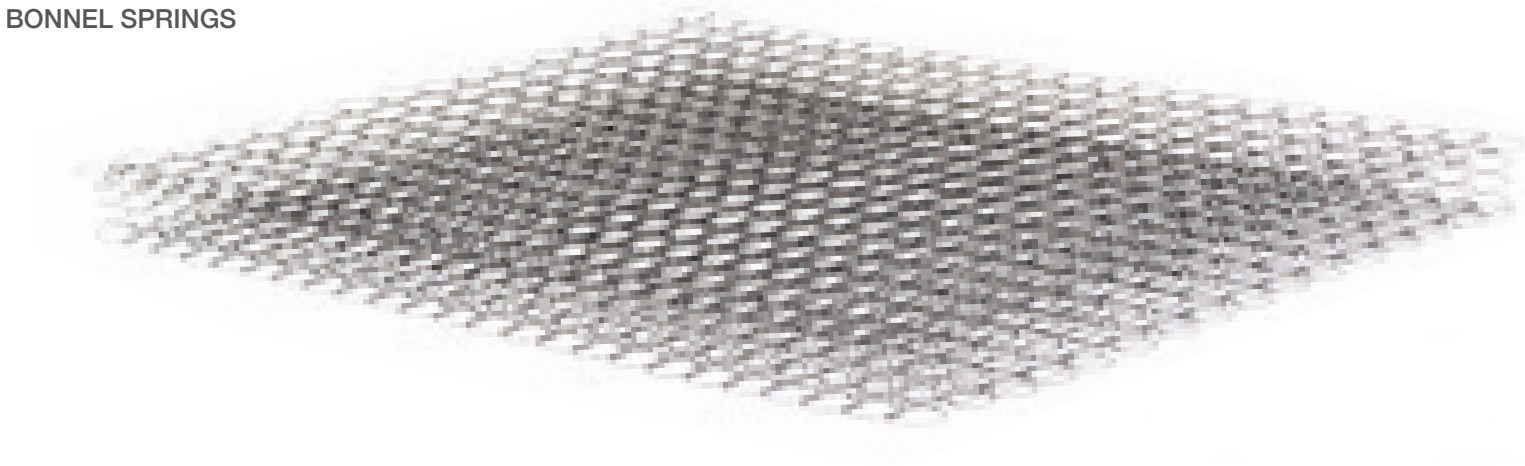

Among the various components crucial to determining mattress quality, springs play a primary role. Permaflex uses Bonnel-type springs made of phosphate-coated carbon steel for its products, as they excel in both comfort and durability performance. Each individual hour-glass-shaped spring is formed from patented, phosphate-treated steel wire with tempering treatment that prevents deformation.

The springs are assembled with a steel wire spiral that ensures their perfect connection while optimizing their synchronized action, guaranteeing excellent stability and durability of the mattress while maintaining firm, stable orthopedic support over time.

OPTIONALS - UNION ZIPPER

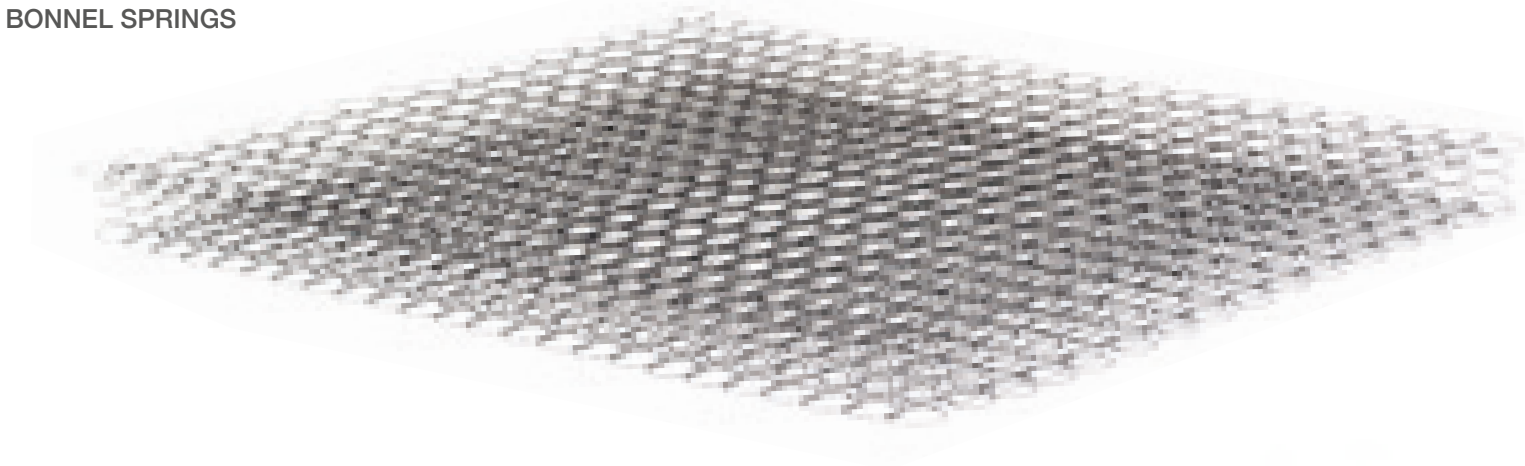

Thanks to the union zipper, available on request, creating a double mattress from two single mattresses has never been so simple. To ensure better anchoring, the zipper is sewn together with the mattress border, thus becoming imperceptible during rest.

COMPONENTS

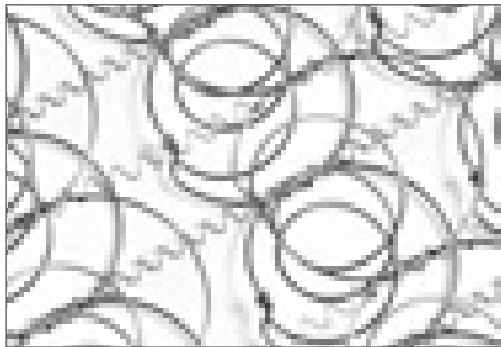

- Multi-needle quilting.
 - Hypoallergenic jacquard covering fabric with checkered pattern.
 - Techno TNT Firestop protective fabric.
 - High bearing hypoallergenic polyester fiber padding.
 - Micro-aerated non-deformable Touch Foam support with calibrated thickness.
 - High-resistance needle-punched felt.
- PiFlex Memory support on 2 sides
 - 700 mini Bonnel springs model.
 - Quilted and padded perimeter band with high breathability.
 - Anti-sag reinforcement perimeter box in high-density micro-aerated Touch Foam with increased thickness of approximately 5 cm.

OPTIONALS - UNION ZIPPER

Thanks to the union zipper, available on request, creating a double mattress from two single mattresses has never been so simple. To ensure better anchoring, the zipper is sewn together with the mattress border, thus becoming imperceptible during rest.

ETERNITY

ETERNITY, exclusive in terms of choice of high quality materials, offers a 5-star rest. Equipped with a solid and special internal structure with a double layer of Bonnel springs, guaranteeing maximum support in every area of the body and ensuring softness, relaxation and comfort. Eternity is enriched with a self-modeling PiFlex Memory layer and two Touch Foam layers. To complete this mattress impeccably are the jacquard fabric covering and a special hypoallergenic fiber padding, perfect for guaranteeing hygiene and breathability.

Available in 2 different heights.

TOUCH FOAM

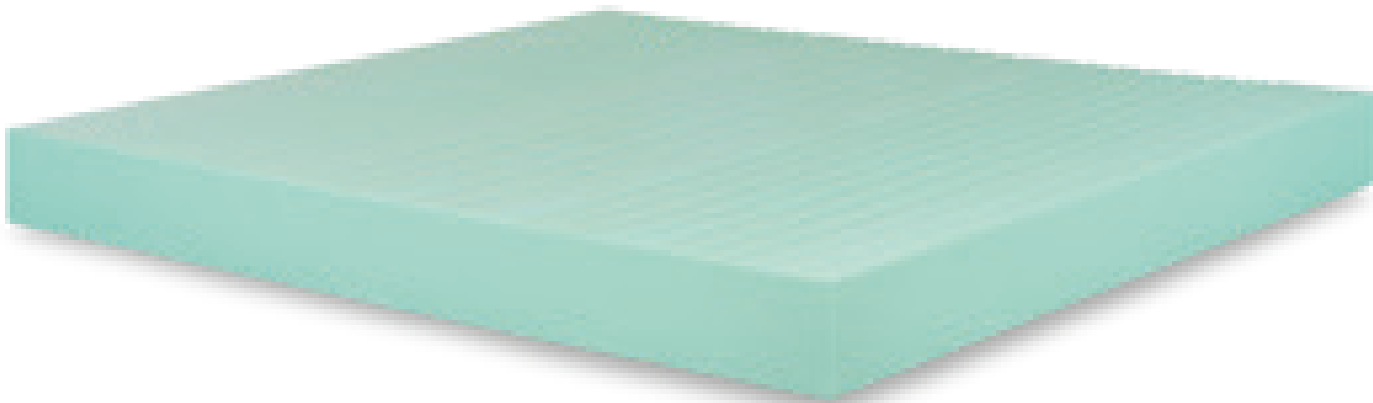

LINE

The Permaflex Research and Development Center creates products featuring innovative technological systems to ensure restorative and healthy sleep for its customers. Touch Foam is a special high-resilience foam produced using a water-based process in a variable pressure environment, specifically engineered for the hospitality sector. Its key features include: firm support, exceptional lightness, excellent shape retention and superior breathability. **PiFlex Memory** is an innovative, state-of-the-art material that delivers maximum comfort and exceptional support; its innovative cellular structure conforms perfectly to the entire body surface, relieving pressure points.

ENERGIZE YOUR LIFE ENERGIZE YOUR SLEEP ALSO IN HOTEL

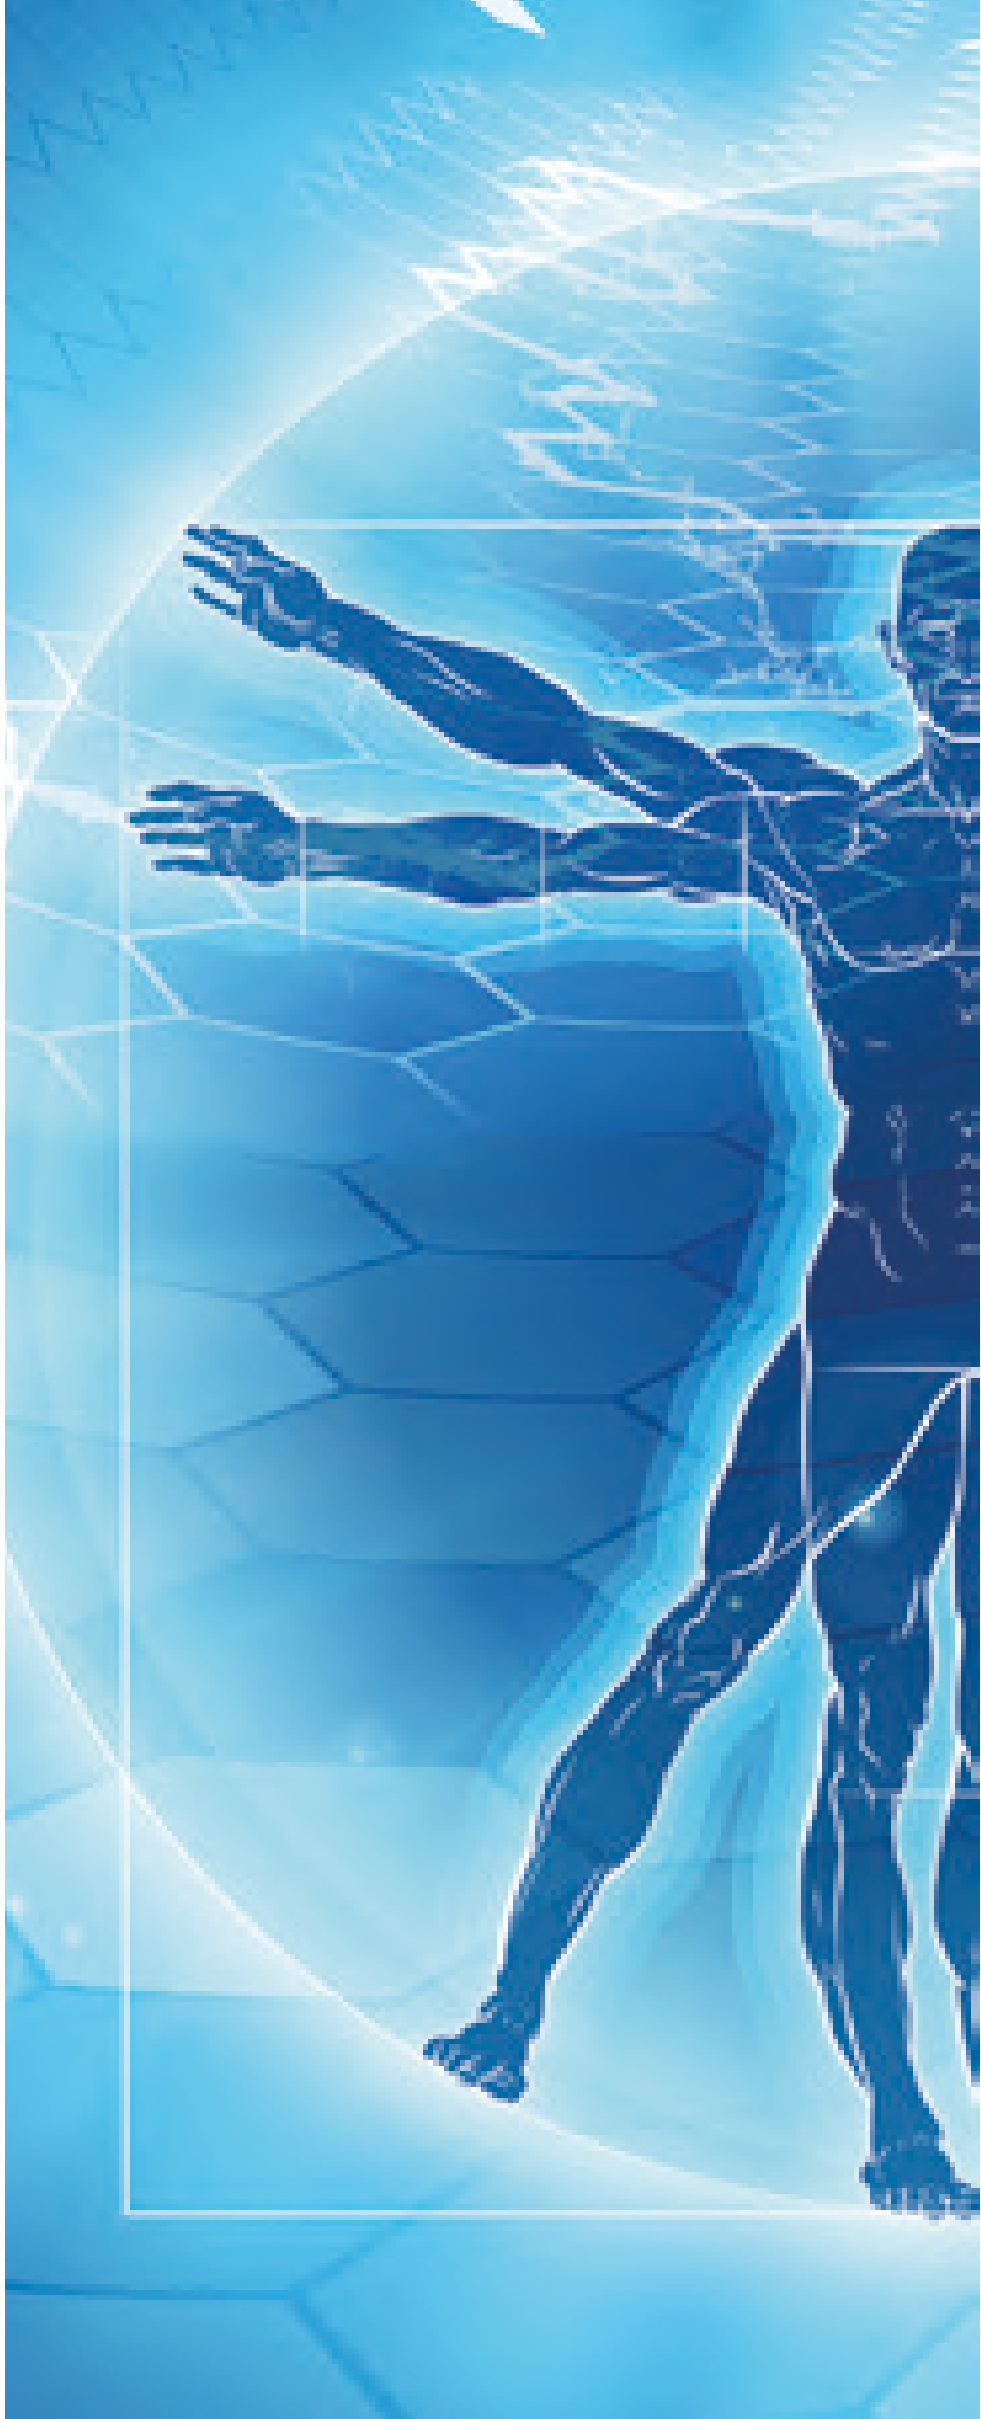

One of Permaflex’s major innovations is the introduction of VIGOR, a technology based on F.I.R. (Far Infrared Ray). This refers to the spectrum of sunlight absorbed by our bodies: invisible energy waves that can penetrate deep into tissues, muscles and bones. Our hands, our bodies and the sun naturally emit this type of infrared radiation. FIR Technology harnesses and amplifies this natural heat. Activated by body heat during sleep, the FIR material emits FIR energy in return, which is absorbed by human cells, triggering a physical phenomenon called “resonance”.

As a result, cellular activity is instantly stimulated, leading to improved blood circulation and enhanced overall metabolism. Numerous studies and publications have documented the benefits of therapies utilizing FIR technology. To implement this technology in our mattresses, the Permaflex Research and Development Center engaged professionals with extensive experience in research on the kinematic, dynamic and neuromuscular aspects of gait and motor function,

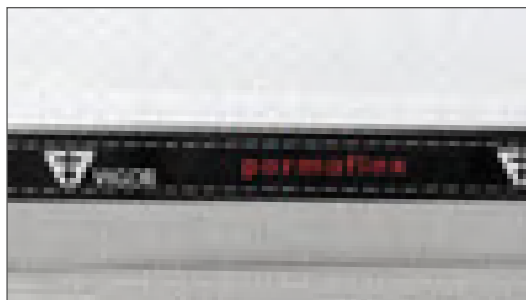

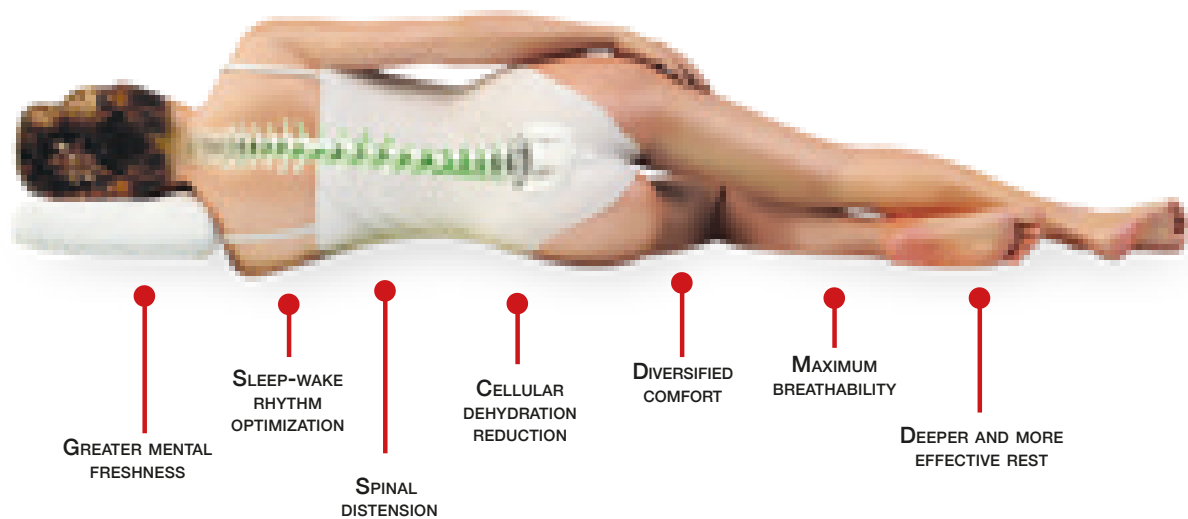

as well as the evaluation of postural and ergonomic factors in athletic and everyday activities. In collaboration with Dr. Pozzo and Mr. Mies, extensive research has been conducted on various aspects of FIR technology, which forms the foundation of Vigor.

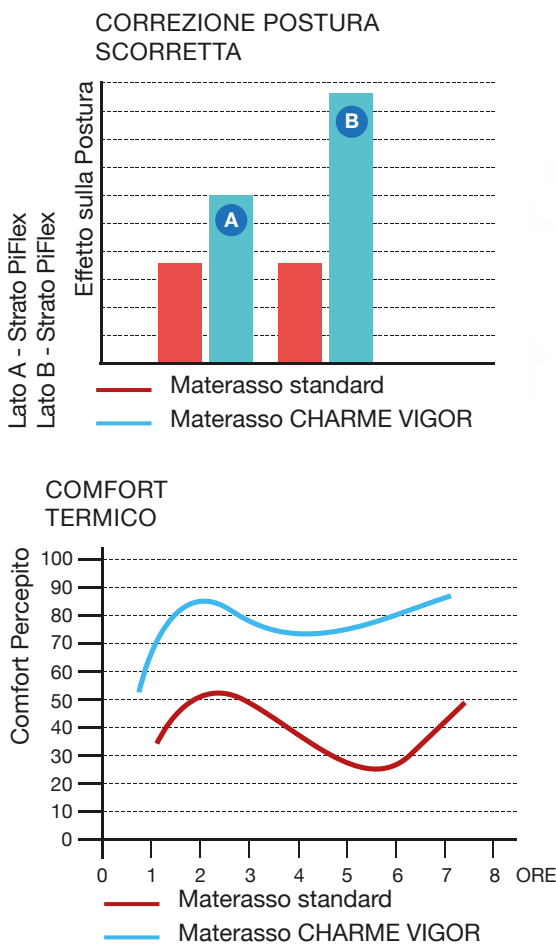

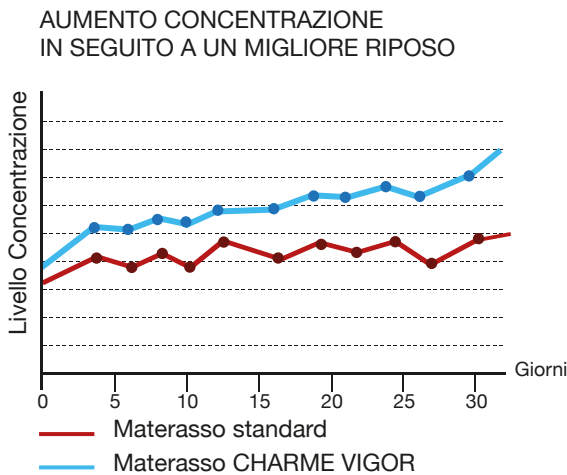

VIGOR PERMAFLEX TECHNOLOGICAL INNOVATION

This line was developed by Permaflex in collaboration with leading research centers. The expertise of distinguished professionals such as Dr. Pozzo (scientific consultant for sports federations and organizations specializing in motor activity) and Mr. Mies (researcher and developer of HERS - Human Energy Recovery System - technology) proved instrumental in developing Vigor technology, which harnesses the properties of F.I.R. The support and experience of renowned biomechanist Prof. Testa (holder of numerous patents, collaborator with the Italian National Football Team, consultant for industry-leading companies such as Ferrari and Lotto, and researcher for FIFA) were invaluable in identifying optimal technical solutions for postural, muscular and joint issues through targeted research that enabled the creation of the VIGOR line. From this philosophy emerged two models for the Hotel Line: **DIVINE VIGOR** and **CHARME VIGOR**.

VIGOR TECHNOLOGY BENEFITS

Vigor technology

DIVINE VIGOR

The spine is the structural axis of the human body and often the first to suffer from stressful and sedentary lifestyles; caring for it must therefore be a priority, and this awareness inspired the creation of **DIVINE VIGOR**. This model is specifically engineered to restore proper spinal alignment during sleep by supporting its natural curves while correcting postural imbalances developed throughout the day. The innovative spring system with differentiated zones provides firmer support in the pelvis-thorax region and softer support for shoulders and legs, creating optimal spinal alignment. The paddings and materials work to soften and relax muscles, facilitating natural spinal decompression while eliminating pressure points in areas prone to herniated discs and vertebral compression. This model incorporates **VIGOR** technology, specifically designed to create perfect synergy with the mattress structure; thanks to the proven properties of **FIR (Far Infrared Ray)**, it relieves musculoskeletal pain and releases accumulated muscle tension, helping to optimize recovery from daily physical stress and delivering overall improvement in sleep quality.

DUVETS AND BLANKETS

COLLECTION

BLANKETS

Most raw materials used for our blankets are 100% natural. We have always embraced the philosophy of authentic Made in Italy craftsmanship, representing quality products and adherence to stringent standards. Our blanket collection ranges from 100% pure virgin wool in multiple weight options to fireproof fiber blankets with Class 1 certification.

DUVETS

Permaflex sources exclusively premium raw materials: down and feathers from goose farms with longstanding tradition and expertise in Hungary, Poland, Romania and France, where birds are raised in optimal conditions promoting healthy development and superior plumage quality. Our down suppliers are members of the EUROPEAN DOWN & FEATHER ASSOCIATION and practices no live-plucking of geese or ducks. All down and feather materials are exclusively European-sourced from farms raising geese and ducks for food production.

GOOSE DOWN DUVET 70

Natural, hypoallergenic, comfortable, warm, lightweight and fully biodegradable: the Borgopiumini duvet. Product quality is ensured through rigorous standards at every production stage, from raw material sourcing through final treatment and processing, under Permaflext supervision. This collaborative partnership represents a meticulous and carefully refined process, producing duvets that deliver lasting warmth and comfort while maintaining their exceptional characteristics over time and repeated use.

NATURAL WOOL BLANKET

Natural wool blankets have been valued for centuries for their beneficial properties and exceptional comfort from first use. Pure wool is naturally flame-resistant, hypoallergenic and breathable; during sleep it naturally regulates body temperature by absorbing moisture, maintaining a fresh, dry sleeping environment for restful sleep. Permaflext Suite Line blankets, the result of continuous research into natural materials, are crafted from 100% natural wool yarn weighing 320 g/m² with a mélange effect. Available in 2 colors with stripe options: 5 cm, 10 cm, or 20 cm intervals.

ORGANIC PRODUCTS
COLLECTION

CERTIFIED ORGANIC

LINE

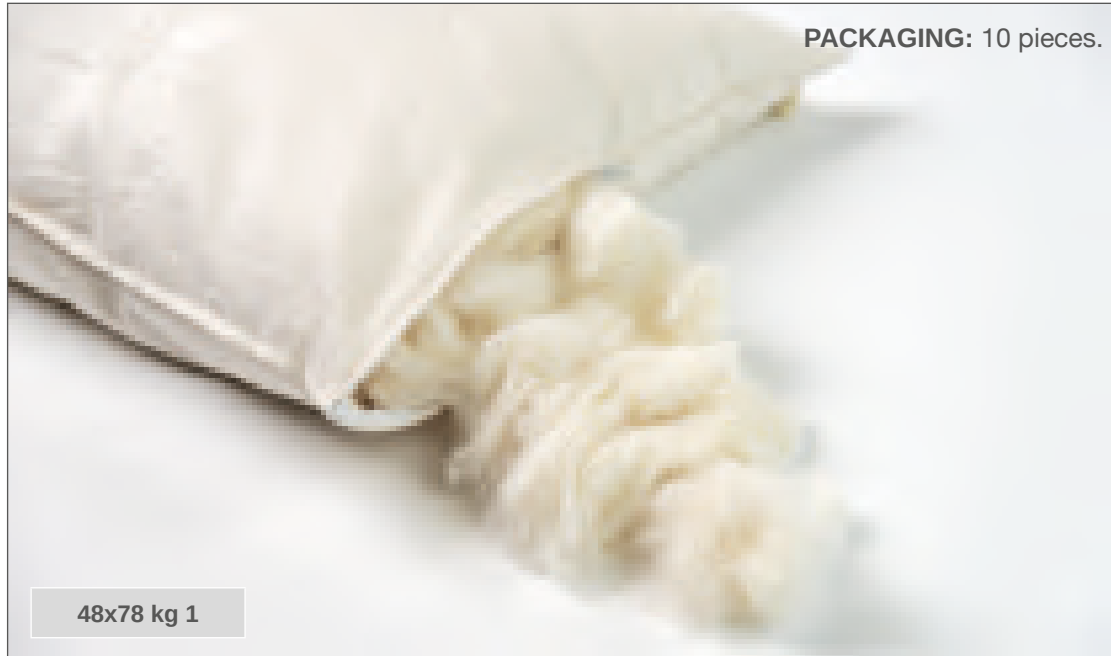

The Natural and Organic Bed Accessories Collection, GOTS Certified, has been developed to enhance sleep wellness and meet the needs of those seeking ethical and safe bedding. Responsible raw material selection and rigorous control throughout all production stages reflect Permaflex’s longstanding commitment to people’s wellbeing and environmental protection, delivering quality, value and safety.

GOTS Certification
GOTS (Global Organic Textile Standard) certification is recognized as the leading standard for sustainable production of garments and textile products made from organically grown natural fibers. This certification ensures that organic textile products are produced according to stringent environmental and social criteria applied throughout the entire production chain, from fiber harvesting through manufacturing to final product labeling, providing credible assurance to consumers.

COTTON PILLOW

NATURAL COTTON VERSION

FILL: 100% untreated natural cotton.
COVER: 100% natural unbleached cotton with zipper on short side, machine washable at 40°C, delicate cycle.

CERTIFIED ORGANIC VERSION

FILL: 100% GOTS certified organic cotton.
COVER: 100% certified organic cotton with zipper on short side, machine washable at 40°C, delicate cycle.

NATURAL COTTON
Cotton is a natural fiber valued for its exceptional breathability and temperature-regulating properties, providing comfortable, natural sleep that is hypoallergenic and gentle on skin.

ORGANIC COTTON
Organic cotton processed without chemical substances. 100% plant-based product. Ideal for those seeking a cool, breathable pillow. Cotton is an excellent temperature regulator and provides firm support.

KAPOK PILLOW

Kapok is a natural plant fiber, soft and lightweight, renowned for its exceptional breathability and temperature-regulating properties. Recommended for combating summer heat and for allergy sufferers.

FILL: 100% kapok fiber.
COVER: 100% natural unbleached cotton with zipper on short side, machine washable at 40°C, delicate cycle.

LINEN PILLOW

Linen is known for its cooling properties. A lightweight, soft pillow with excellent breathability. Recommended for combating summer heat as it absorbs moisture and heat. Beneficial for allergy sufferers and preventive care.

FILL: 70% linen, 30% polyester.
COVER: 80% linen, 20% untreated natural cotton, with zipper on short side.

SPELT HUSK PILLOW

VERSIONE NATURALE

FILL: 100% spelt husk.
- **INNER PROTECTIVE COVER:** 100% cotton.
- **OUTER COVER:** 100% cotton with zipper on short side, machine washable at 40°C, delicate cycle. Inner pillow NOT WASHABLE.

CERTIFIED ORGANIC VERSION

FILL: 100% certified organic spelt husks.
- **INNER PROTECTIVE COVER:** 100% organic cotton jersey with zipper.
- **OUTER COVER:** 100% GOTS certified organic cotton with zipper on short side, machine washable at 40°C, delicate cycle.

An anatomical pillow that adapts to neck curvature and any sleeping position. The spelt husk fill provides support and massages the cervical region. Also offers relief from neck muscle pain, migraines, and spinal discomfort.

ORGANIC COTTON AND ORGANIC LAVENDER PILLOW

Soft and welcoming pillow with natural lavender fragrance, provides support against muscle pain, headaches, migraines and promotes sleep.

FILL: 100% untreated organic cotton flakes, dried organic lavender flowers.
COVER: 100% organic cotton with zipper on short side.

ORGANIC COTTON AND ALPINE HERBS PILLOW

A pillow combining the softness of organic cotton with the benefits of alpine herbs, which promote respiration through balsamic essences, delivering a sensation of freshness and wellbeing. Ideal for those seeking restorative sleep.

FILL: 80% organic cotton, 20% organic alpine herbs.
COVER: 100% organic cotton with zipper on short side.

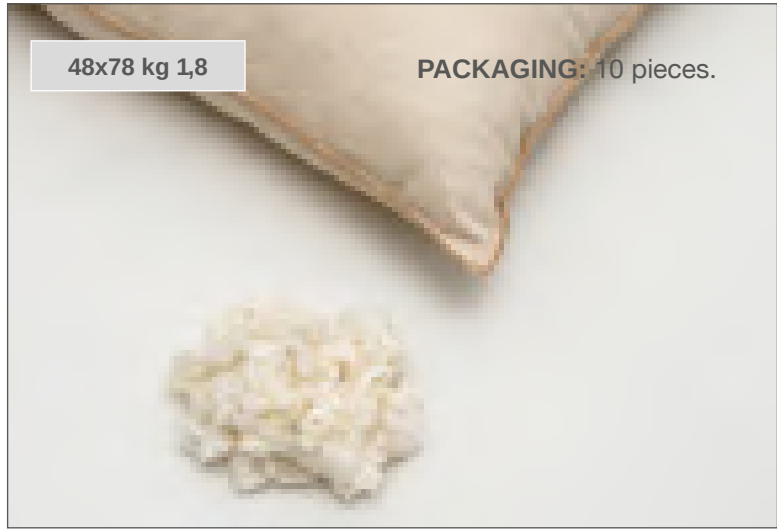

ORGANIC COTTON AND
ORGANIC MELISSA PILLOW

Soft and comfortable pillow with natural melissa (lemon balm) fragrance. Promotes emotional balance and reduces hyperactivity. Excellent for counteracting insomnia, tachycardia and anxiety-related abdominal spasms.

FILL: 100% untreated organic cotton flakes, dried organic melissa leaves
COVER: 100% organic cotton with zipper on short side.

COTTON AND LATEX
FLAKES PILLOW

Pillow crafted with 100% natural latex flakes, free from harmful chemicals. Breathable and cool, excellent for side sleepers. Provides natural, restorative sleep.

FILL: 80% latex flakes, 20% cotton flakes.
OUTER COVER: 70% natural cotton, 30% viscose.

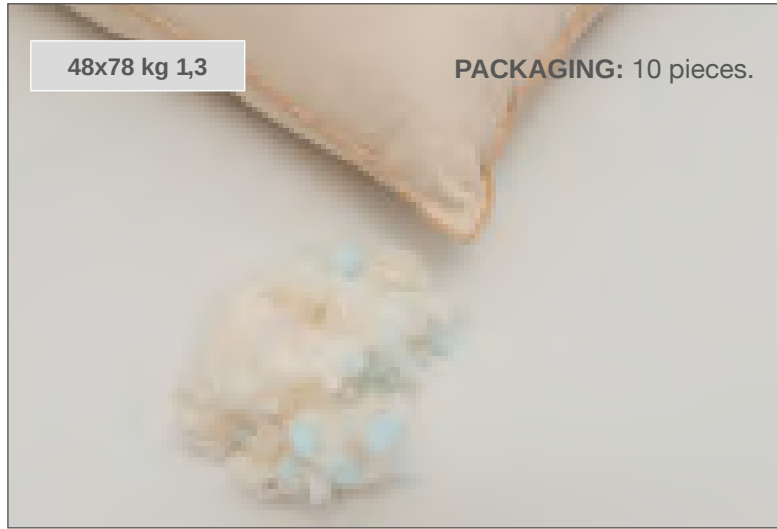

SHORN WOOL AND
ORGANIC SWISS PINE PILLOW

Ideal for those desiring cool, fresh sleep throughout the night. Wool has temperature-regulating properties, while Swiss pine contains essential oils that enhance relaxation, reduce stress and promote psycho-physical wellbeing, facilitating restful sleep.

FILL: 90% organic shorn wool flakes, 10% organic Swiss pine flakes.
COVER: 100% organic cotton with zipper on short side.

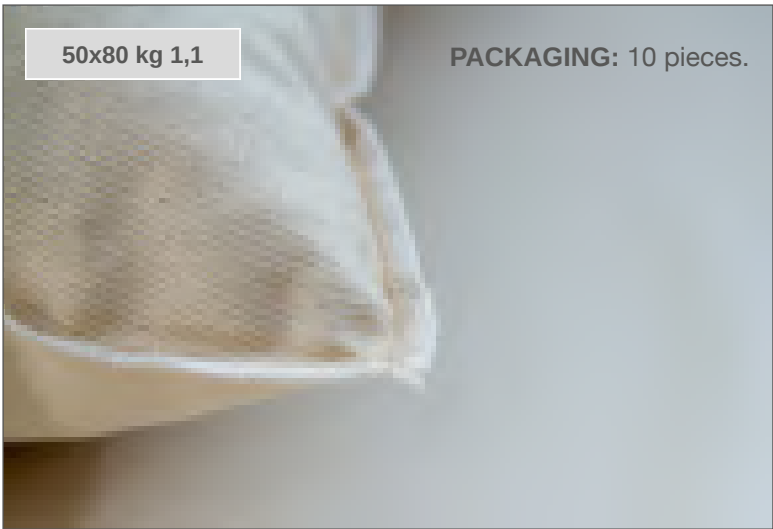

COTTON AND MEMORY
FLAKES PILLOW

Comfortable and resilient pillow crafted with innovative memory foam blends containing plant extracts that ensure total wellbeing in harmony with nature. Shape-retaining, mold-resistant with superior breathability.

FILL: 80% Memory foam flakes, 20% cotton flakes.
OUTER COVER: 70% natural cotton, 30% viscose with zipper on short side.

RECYCLED
COTTON PILLOW

Pillow crafted with regenerated and regenerable fibers. We believe in a future where producing new virgin resources is no longer necessary, because the most sustainable textile resources are those that already exist.

FILL: Regenerated and regenerable fibers (cotton, viscose, linen, hemp, camel, coconut, soy, latex).
COVER: 70% recycled cotton, 30% viscose.

NATURAL COTTON
MATTRESS PROTECTOR

Mattress protector, fitted with all-around elastic, naturally processed without formaldehyde, pesticides, bleaching agents or dyes. Healthy, hygienic, plant-based, offering excellent natural temperature regulation for healthy, restorative sleep.

100% natural unbleached cotton, fitted with all-around elastic along the entire perimeter, machine washable at 60°C.
SIZES: 80x190/200 - 90x190/200 - 120x190/200 - 160x190/200 - 180x190/200

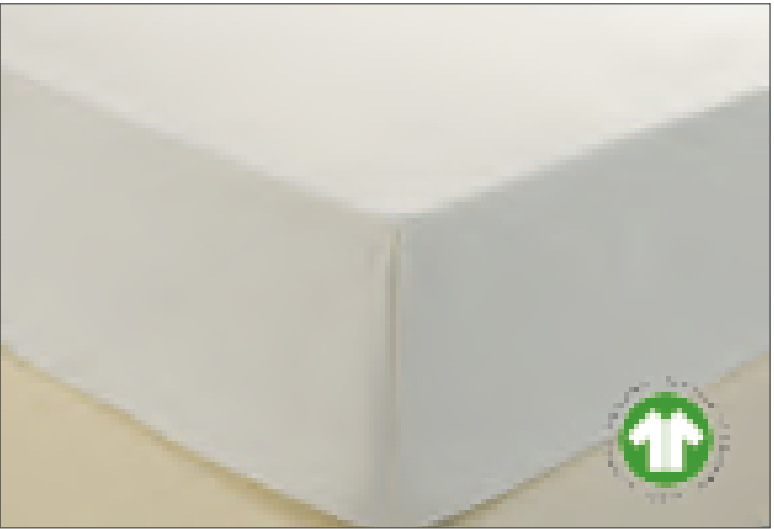

NATURAL/CERT. ORGANIC
COTTON PILLOW COVER

Pillow cover in naturally processed cotton without formaldehyde, pesticides, bleaching agents or dyes. Healthy and hygienic, it offers excellent temperature regulation for healthy, restorative sleep. Available in natural and GOTS certified organic versions.

Natural Version - COVER: 100% natural unbleached cotton with zipper on short side, machine washable at 40°C, delicate cycle.
Certified Organic Version - COVER: 100% GOTS certified organic cotton with zipper on short side, machine washable at 40°C.

DECORATIVE CUSHIONS

The Permaflex decorative cushion is produced with our catalog fabrics, optionally coordinated with decorative cushions, som-miers and headboards, or with client-supplied fabric. The cushion interior is filled with soft 100% hypoallergenic polyester fiber and covered with a polypropylene liner (non-woven fabric). The outer fabric cover features a zipper for easy removal of the inner cushion. Available in various sizes. The cushion is manufactured and packaged in Italy. Additional sizes available upon request.

RUNNER

The runner is a fabric strip that dresses the bed, adding an elegant and sophisticated touch that brings personality to hotel rooms, B&Bs or agritourism properties. Easy maintenance is another advantage of runners, machine washable at indicated temperatures, they will always look perfect thanks to their tested durability. Produced with our catalog fabrics, optionally coordinated with deco-rative cushions, sommiers and headboards, or with client-supplied fabric.

IMPERIAL

Imperial is the Permaflex bed base renowned for its undisputed characteristics of sturdiness and stability. The solid metal frame features scratch-resistant coating in all sizes. Additionally, the double size version is equipped with a dual central anti-sag support with anti-squeak foam..
G.d.P. Guaranteed by Permaflex.

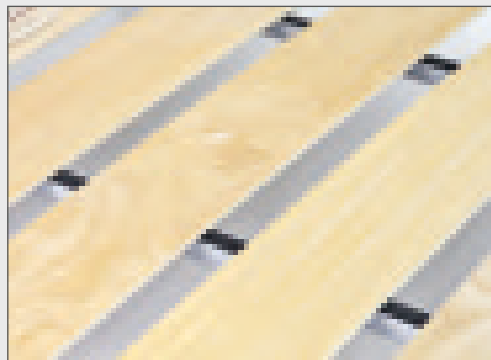

H. **35**cm approx TOTAL BED BASE HEIGHT

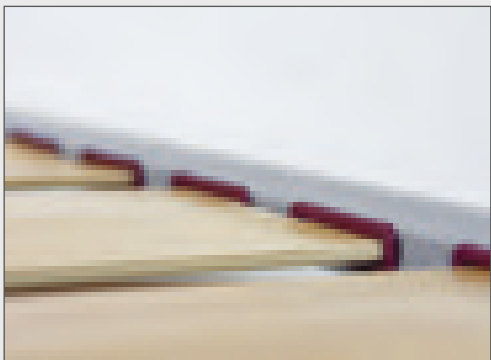

NOTE: Due to production requirements, metal bed base frames may vary from grey to black color.

TECHNICAL FEATURES

Structure with 7 reinforced beech slats

Techno-polymer slat holders

Frame with epoxy coating and dual central reinforcements, 40 x 25 cm dimension

EQUILIBRIUM

Equilibrium promises clients maximum comfort without compromising support. Twelve multilayer beech slats, including two reinforced slats in the lumbar zone providing differentiated support in the pelvic area and increased flexibility in the shoulder and leg zones, combined with the steel frame featuring scratch-resistant coating, characterize the supporting structure of this bed base.
G.d.P. Guaranteed by Permaflex.

COURTESY ITEMS
AND FRAGRANCES
COLLECTION

FRAGRANCE COLLECTION

The Permaflex universe is enriched with fresh and clean, sparkling and floral, citrus and spicy, balsamic and intense scents. Inspired by the deepest emotions, the fragrances created for Permaflex transform any space into a dreamlike world, where everything around us brings pleasure to the eyes, mind, and sense of smell. Encased in three original decorative items, these fragrances are much more than simple objects: they evoke emotions and memories, promote relaxation and purity, and stimulate concentration and energy.

SCENTED CANDLES

Made with vegetable wax and a natural bio cotton wick, Permaflex candles are enriched with essential oils and fragrances, all certified according to IFRA standards. This is how a simple scented candle transforms, thanks also to its delicate and discreet design, into an excellent decorative element suitable for any environment. Permaflex candles allow you to create romantic and reined atmospheres, regardless of the fragrance chosen..

ULTRASONIC DIFFUSER

The essential oil diffuser selected by Permaflex is a small device that disperses fragrances throughout domestic and non-domestic environments. Aromatherapy, through proper diffusion of essential oils, can help improve our physical and mental well-being depending on the chosen scent. For this reason, Permaflex, always attentive to the well-being of its customers, has created these selections, suitable for different situations and moods, all designed to lift the spirit and reduce stress and anxiety levels.

FRAGRANCED OILS

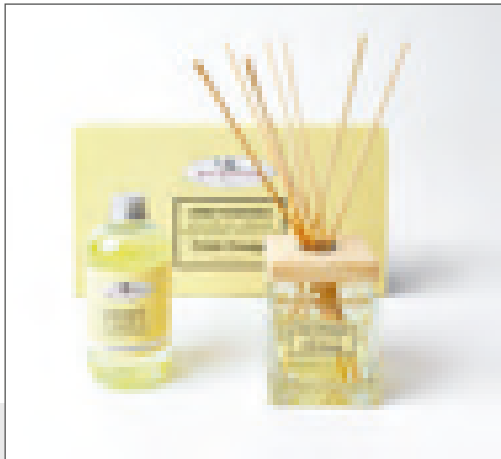

Permaflex has created a selection of oils and essences to be used with the ultrasonic diffuser as aromatherapy, a practice that acts on a person's physical and mental well-being through inhalation of volatile substances, such as those present in essential oils. The benefits depend on the aroma chosen; they can be vaporized to reduce stress and aid concentration or to create an environment that promotes relaxation. They can also be used outdoors to create a pleasant and calming atmosphere during an outdoor dinner. The choice is yours.

FRAGRANCE DIFFUSERS
Discreet and refined, this Permaflex diffuser consists of a very elegant glass bottle with soft, simple lines, topped with a natural wooden drip-proof cap in an oriental style. Inside, rattan sticks are inserted, which absorb the delightful scented notes and then release them pleasantly into the chosen environment, providing the most sublime sensations evoked by the fragrances selected by Permaflex.

PETIT ORANGE

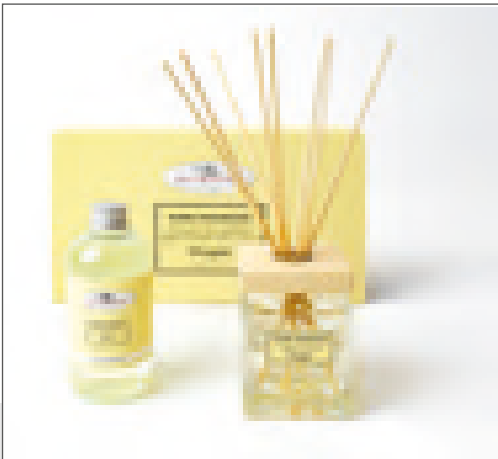

A symphony of citrus and green notes that clear the mind and convey sunshine and optimism, giving a sense of simple elegance and cleanliness to the surrounding environment.

The citrus top notes are accompanied by the freshest and most persistent floral notes of neroli and orange blossoms, along with the spicy and woody notes of patchouli and cedarwood, which tone down the sweetness and evoke a feeling of renewal.

TOP NOTES:
Bitter orange, green lemon,
Calabrian bergamot
HEART NOTES:
Petitgrain, neroli, orange blossoms
BASE NOTES:
Cedarwood,
Malacca patchouli.

OXYGEN

A sparkling fragrance of fruits and flowers with airy and aquatic opening notes, followed by a warm, lightly spiced heart, finishing with a woody and green base.

A blend that delights the senses, a fresh wave of oxygen that gives the room a bright, airy, and clean atmosphere..

TOP NOTES:
Pineapple, mandarin,
papaya, cardamom
HEART NOTES:
Nutmeg, violet, iris rhizome, freesia
BASE NOTES:
Sandalwood, cedarwood,
amber, musk.

FRESH LINEN

A fresh and clean fragrance with clear hints of cotton flowers and orange blossoms that benefit the psyche. Talc and lily of the valley enhance connection with the natural world, while white flowers contribute to spiritual elevation.

The slightly musky and amber base warms the environment and enhances the delicacy of the flowers, giving the comforting sensation usually experienced with freshly laundered linen on a pleasant spring day.

TOP NOTES:
Cotton flowers,
Sicilian orange blossoms
HEART NOTES:
Talc,lily of the valley, white roses,
night-blooming jasmine
BASE NOTES:
Oakmoss, amber,
tonka bean.

CORTESIA PERMAFLEX

At Permaflex, we understand the importance for hospitality facilities of creating pleasantly lasting memories that connect guests’ sensations to a specific place. For this reason, we have created a selection of accessories designed to welcome your guests from the very first moment, leaving a long-lasting impression of their stay. Simple objects, small attentions. These are the details that make the real difference in welcoming guests and turning their stay into a memorable experience.

Pack of 500 pieces..

TERMS AND CONDITIONS OF SALE

General Terms of Sale

By placing an order, the following general conditions are accepted, without the need for explicit acceptance. Supplies are carried out as promptly as possible according to stock and production availability. Any delivery times indicated in the order are not to be considered binding. Force majeure exempts the supplier from the commitment to deliver; ITALBED S.r.l. is released from any penalties or liability for possible delays. All goods ordered, regardless of the method of shipment, travel at the buyer's risk. Returns or replacements of goods duly delivered are not accepted unless expressly authorized by the company. Any missing, non-conforming, or visibly defective goods must be reported immediately upon delivery and in any case within 8 days of receipt. Later claims cannot be accepted. Reporting defects does not authorize the deferral or suspension of payments, and invoices issued for partial deliveries must be paid within the agreed terms. Any agreed returns are considered free shipping (Porto Franco) and with intact packaging.

Notes

Technical characteristics of products and/or fabric designs and colors presented in this catalog are not binding. ITALBED S.r.l. reserves the right to modify them without notice. PiFlex/Touch Foam mattresses may undergo color variations that do not affect the technical properties of the products.

Transportation – Vehicle Side Delivery

Free delivery in Italy for orders over €2,000 (excluding VAT), except for: Sardinia, smaller islands (Ischia, Capri, Aeolian Islands, Elba, etc.), Venice Lagoon, and Alpine Refuges, for which a quotation must be requested. For all orders under €2,000, a shipping contribution of €70 applies. For shipments via courier, costs for packaging and transport will be charged on the invoice..

Delivery Times

Delivery is within 30 working days from the confirmed order with the related deposit. If a later date is required, it must be specified in the order. If the produced goods are not collected by the customer within one week after the confirmed delivery date, storage fees will be charged.

Optional Delivery Services

We offer our clients the possibility of:
1) Delivery of new mattresses and bed bases to the room (including disposal of packaging and assembly of bed base feet);
2) Collection and disposal of old mattresses and bed bases (in equal number to those delivered).

Warranty Terms

Permaflex guarantees free repair or replacement of the mattress or its components if defective in manufacturing or materials but does not cover accidental damage or consequences due to negligence or failure to follow the usage and maintenance instructions in this Warranty Certificate. The warranty is void, and the manufacturer is not liable for damages to property, animals, or persons in the following cases:

- Subjective dissatisfaction with product characteristics (e.g., mattress too soft/firm).
- Failure to follow usage and maintenance instructions.
- Accidental damage or transport damage if not reported upon delivery.
- Use not conforming to intended purpose.
- Modification or alteration of the product or its components.
- Failure to use a mattress protector.
- Damage due to normal wear.
- Damage caused by external agents (fire, water, steam).

- Use of a support base (wood or metal frame) of dimensions different from the mattress.
- Defects caused by the end user, such as cuts, tears, rips, holes, or stains on the fabric. Formation of pilling (lint balls) is NOT covered by the warranty, as synthetic fibers in bedding may cause this phenomenon.
- PiFlex and Touch Foam mattresses may yellow due to light exposure (sun or artificial), which does not affect product characteristics..
- Improper handling or excessive weight load.
- Repairs performed by the customer or third parties.
- Poor hygiene or soiling (organic liquids), as specified by the Consumer Code (D.L. No. 206 of 06/09/2005 and subsequent amendments).
- Mold formation after 4 months of use (tested as due to environmental contamination).

To activate this warranty, the customer must report defects in writing via registered mail, accompanied by photographic evidence of non-conformity, within 2 MONTHS of discovering the defect (Art. 132 of D.L. No. 206 of 06/09/2005 and subsequent amendments). ITALBED S.R.L. will carry out repair or replacement only after verification by its personnel. If the defect does not exist or is not due to manufacturing or conformity issues, no action will be taken..

Defined Tolerances in Compliance with Standards:

- Depressions ≤ 30 mm (physiological value due to bedding settling, measured according to UNI EN 1334). Slight sinking in sleeping areas is NOT A DEFECT, but a characteristic of the mattress;
- Dimensional tolerance ± 2 cm (in accordance with UNI EN 1334);
- Any odors from newly purchased mattresses disappear within 7–15 days (ventilate the room for faster dispersion);
- Minor surface marks due to natural wear.

Note: Mattress height must be measured according to UNI EN 1334.
